

score, by event and gender, are listed in the table below. An applicant who achieves the maximum level on either of the first two events should not attempt further repetitions, as this will not improve his/her score.

	Crunches	Push-Ups	1-Mile
Male	95	75	5:20
Female	95	50	6:00

Test Site

The AFA can be administered in two adjacent venues; an indoor gymnasium and an outdoor track.

The 1-mile run is the last event administered in the AFA. Although it may be administered in an indoor gymnasium or stadium, time has been allotted for transit to an outdoor track. Regardless of the 1-mile run course, the running surface should be flat and free of debris. In either the indoor or outdoor facility, it is imperative that the 1-mile distance be measured accurately. In submitting the time for the run, the applicant and scorer are affirming that the 1-mile distance has been measured and is accurate.

Test Procedures

The AFA may be conducted at any time during the application period (November thru February) but must be accomplished in order for the application to be processed by the recruiter. Results of each ev1.0-2.99(oe)-1898(v)3t1.0-2.99(oe)994e

Testing Sequence

The test sequence will follow the order listed below. This order cannot be modified. There are no exceptions to this sequence or timing.

Events	Test Start Time	Event Testing Time	Rest	Total Elapsed Time
Crunches	0:00	2 minutes	3 minutes	5:00
Push-Ups	5:00	2 minutes	3 minutes	10:00
1-Mile Run	15:00	10 minutes	5 minutes*	

Assume a prone (abdomen toward the ground) position supported on one knee on a 1-inch mat or a hard surface floor.

On the command "READY POSITION", assume the front-leaning rest position (arms extended) by placing your hands where they are comfortable (Width is variable). Feet may be together or up to 12 inches apart. When viewed from the side, your body should form a straight line from your shoulders to your ankles.

On the command "GO", begin the push-up event by bending elbows and lowering entire body as a single unit until your upper arms are at least parallel to the ground (90-degree bend). Return to the starting position by extending arms and raising entire body as a single unit until arms are fully extended.

May rest in the up position, flexing or bowing the back as long as hands and feet remain in contact with the floor, and no other body part touches the floor.

Must return to the generally straight body position before attempting another repetition.

The scorer will:

Note the event start time (should be 10:00 elapsed).

Give the command "GO" and start a stopwatch for a 2-minute trial.

Monitor each repetition, making sure body remains straight, moving as a single unit, upper arm is parallel to the floor in the down position, and the arms come to full extension in the up position.

Verbalize "NO" for any repetition that does not meet the criteria listed above.
Stop the test at the 2-minute mark and record the number of repetitions.

Terminate the event if the candidate lifts a hand or foot off the ground or touches the ground with any body part other than the hands or feet.

Mile Run

This measures aerobic capacity and endurance.

The candidate must:

Run continuously for one mile (walking is allowed although strongly discouraged).

The scorer will:

Certify the 1-mile run distance.

Note the start time (should be 15:00 elapsed)

Give the command "GO" and start a stopwatch.

Monitor the candidate to make sure that he/she does not:

Receive physical help during the event.

Leave the designated running course for any reason.

Receive pacing by another person.

Stop the watch as the candidate crosses the finish line, and record the score in minutes and seconds.
